

**SmartTime**  
IT'S ABOUT TIME

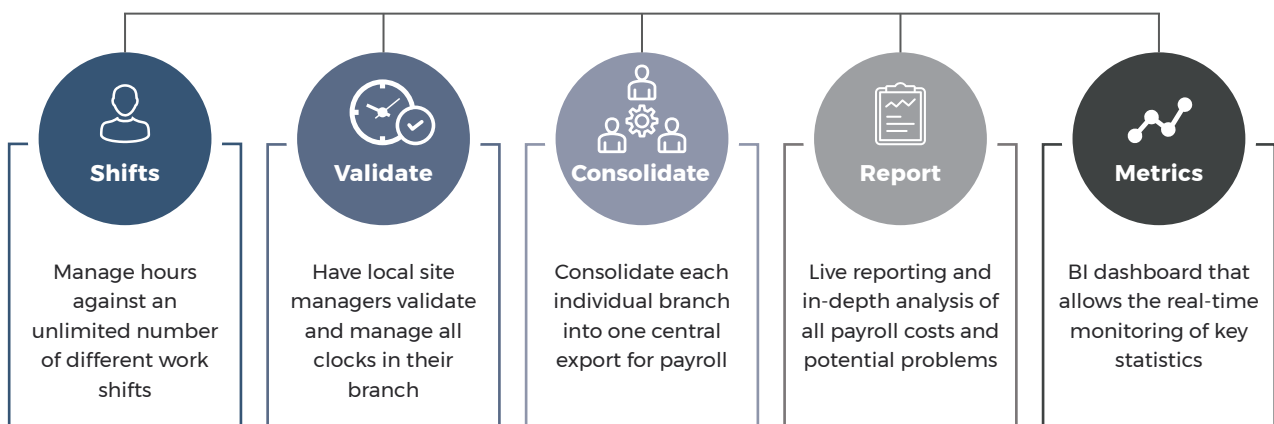

## Enterprise-level, cloud-based **Time & Attendance System**

*Fully integrated with our extremely powerful IQSuite.cloud platform, SmartTime is a powerful time & attendance engine that allows for full manipulation of the raw clocks collected by IQSuite.cloud into a directly exportable payroll file. With limitless shifts, customisable rules and exceptional reporting, SmartTime is an application that generates instant ROI by automating processes and reducing fraud in the wages component of any company payroll.*

**SmartTime is an incredibly versatile and flexible time & attendance system that allows absolute control over payroll costs.**

The application is designed to manage the following tasks:

Cloud-based  
Biometric Identity  
Verification Solutions

## Why is SmartTime right for Your Business?

Time and attendance tracking is a critical component of human capital management, and is one that can offer a fast and significant return on investment based on time and cost savings. **SmartTime's** industry-leading time and attendance capabilities enable you to streamline payroll preparation, simplify employee scheduling, improve wage and hour compliance, and manage absenteeism.

Tracking who's working, when and how much can be a difficult and time-consuming task. But with **SmartTime**, time and attendance isn't just good management - it's the foundation for making smarter employee decisions.

### **SmartTime provides tools for:**

- Tracking time and attendance
- Managing shifts and leave
- Scheduling so you're covered when you need it
- Analysing and reporting on your labour force

These tools, backed by our unrivalled support and expertise, will transform how you track time and attendance, and what it means to your business.
